

Why Choose Trend Micro™ Client/Server/Messaging Suite for SMB for Your Growing Business?

Trend Micro™ Client/Server Messaging Suite for SMB

Trend Micro™ Client/Server/Messaging Suite for Small and Medium Business (SMB) is an integrated, file-based antivirus and anti-spam software solution for networked workstations, servers, and Microsoft Exchange™ servers. Client/Server/Messaging Suite for SMB scans for and minimizes virus threats within a company's network and blocks spam at the Microsoft Exchange mail server.

Client/Server/Messaging Suite for SMB delivers superior spam detection with low false positive rates by combining advanced, heuristic anti-spam engine functionality with signature lookup capabilities and by using advanced approved and denied lists. Client/Server/Messaging Suite for SMB eliminates the complex task of maintaining multiple security solutions by using a single Web-based management console designed for ease-of-use.

Client Server Messaging Suite for SMB Advantage

PURPOSE-BUILT FOR SMB WITH MICROSOFT EXCHANGE. Client/Server/Messaging Suite simplifies installation, configuration, and support via a single, intuitive Web-based management console.

SINGLE DEPLOYMENT eliminates the complexity of maintaining three individual antivirus solutions. Client/Server/Messaging Suite for SMB provides protection for desktops, file servers, and Microsoft Exchange servers.

RELIABLE AND COMPREHENSIVE PROTECTION helps protect desktops, file servers, and email servers transparently with minimal interference to system operations. Client/Server/Messaging Suite for SMB is designed to minimize threats from viruses, Trojans, worms, and other malicious code that can infiltrate the internal network via email, Web downloads, or file sharing.

ADVANCED, HEURISTIC ANTI-SPAM ENGINE combined with a spam signature database and approved and denied sender lists deliver accurate spam detection with a low false positive rate. Client/Server/Messaging Suite for SMB is also designed to block emails that are considered spam or tag them for filtering.

FAST AND EASY INSTALLATION is facilitated by remote and simultaneous installation onto multiple PCs and servers, saving time and effort.

AUTOMATIC TRANSPARENT UPDATES maintain up-to-date virus protection without user intervention. Client/Server/Messaging Suite for SMB also performs hourly virus update checks.

VIRUS OUTBREAK MONITOR proactively monitors network and system activities for early warning signs of new, unknown threats.

DAMAGE CLEAN-UP CAPABILITIES help automatically clean and restore infected systems to their original state, reducing system downtime and clean-up efforts.

LOWER TOTAL COST OF OWNERSHIP. Single package reduces initial purchase cost. Ease of use, deployment, and maintenance drive lower ongoing maintenance costs contributing to an overall lower total cost of ownership.

KEY PRODUCT FEATURES

- Integrated antivirus and anti-spam
- Purpose-built for SMB
- Single install; easy push to desktops, file, and Microsoft Exchange servers.
- Simple configuration and support
- Automatic removal of competitor and out-dated antivirus solutions

“ Since we started using Trend Micro Client/Server/Messaging Suite and Client/Server Suite for SMB, we haven't needed to use any other antivirus software. In my opinion, all others are just trying to keep up with Trend Micro standards. This software is so easy to install and use that no one on our staff has to worry about changing settings when scanning files. It works the way Trend Micro says it does! ”

—Mark Totz
IT Manager MBKK

Why Choose Trend Micro™ Client/Server/Messaging Suite for SMB for Your Growing Business?

Product Comparison

The single-package solution of Client/Server/Messaging Suite for SMB provides protection across various segments and integrated anti-spam functionality with a single install. Other products (as shown in the table below) require three or five

installs to achieve the same benefit. Designed with small and medium businesses in mind, Client/Server/Messaging Suite for SMB empowers small business owners to deploy and manage an effective antivirus strategy with limited IT investment.

Trend Micro vs. Symantec™ and McAfee™

Top Security Requirements	File-based Antivirus and Anti-spam Software Solution		
	Trend Micro Client/Server/Messaging Suite for SMB	Symantec™ Antivirus 9.0 with Groupware Protection	McAfee™ Active Virus Scan for SMB Edition
Number of Installations and Installation Procedure	One simple easy installation. Install to a Windows server. Deploy protection to PC, Windows, and Exchange servers remotely. 1 INSTALLATION	Four installations for desktop and server virus protection. An additional installation for Microsoft Exchange protection. 5 INSTALLATIONS	Three separate installations for desktop and server protection. McAfee GroupShield for Exchange needs to be installed locally on each Microsoft Exchange server. 3 INSTALLATIONS
Number of servers required for deployment	One	Four	Two
Pattern File updates	One across all entry points	Several	Several
Anti-spam technology	Heuristic	Dictionary-based	Heuristic
Admin. Updates and finetuning necessary for Anti-spam	Minimal	Significant; needs defining & maintaining spam keywords	Minimal
Exchange Protection integrated within the solution (Virus & Spam)	Yes	No; separate product, installation, documentation, and console	Yes; but Spam protection is a 90 day trial only
Management Consoles	One - web based	Four - Windows based	Three - MMC based
Outbreak Response Virus/Trojan Cleanup	Automated	Manual	Semi-Automated
Outbreak Monitoring	Yes	No	No
